

Sage 50 Accounts 2010: System requirements

To get the best possible performance from your Sage software, it's important to check that your PC meets the **minimum** requirements of the software and, where possible, the **recommended** requirements.

Recommended requirements

- An IBM-compatible computer with a 2 GHz (or equivalent) processor
- At least 1GB RAM
- At least 1GBMB of free disk space after Microsoft ®Windows has been installed
- Windows 2000; Windows Server 2003; Windows XP (recommended); Windows Vista
- Network users only: 1Gbps network cards and switches with Microsoft Windows networking

Works with Microsoft Office 2000 and all later editions.

Please ensure that the latest Microsoft updates are installed.

Performance will be improved with higher specification computers and networks

Minimum requirements

- An IBM-compatible PC with 1Ghz (or equivalent) processor
- 512MB RAM
- 700MB of free disk space after Microsoft Windows has been installed
- Windows 2000; Windows Server 2003; Windows XP (recommended); Windows Vista
- Network users only: 100Mbps network with Microsoft Windows networking

Works with Microsoft Office 2000 and all later editions.

Please ensure that the latest Microsoft updates are installed.

Performance will be improved with higher specification computers and networks
